Subject: What I want to see at Kennecott

CC: Munson, Tom; White, Susan

I want to look at Bastian Sink and discuss whether we need interim revegetation. I would like to know what activities took place on other parts of the area, what reclamation was done, and what the postmining land uses are. Are land use plans approved for these areas? What about the drainages where they did remedial work several years ago? I don't want to revisit an issue we've already covered, but I don't know the status of these areas from the Division's viewpoint. I don't necessarily need to see the road, but its postmining land use will be an issue if they plan to leave it.

While we're in the area, I would like to look at Copper Notch and see what's been done about getting interim vegetation.
